beyond the disclosure as filed, as indicated in the Supplemental Box (teat visitation under Article 14 are referred  * Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred  this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)  this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)  **Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

Form PCT/IPEA/409 (Box I) (July 1998)

International application No. PCT/US03/36906

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1. STATEMENT					
Novelty (N)	Claims	7 and 10-21	YES		
	Claims	1-6, 8 and 9	NO		
	<b>a</b>		3270		
Inventive Step (IS)		7 and 10-21 1-6, 8 and 9	YES		
	Clains	1-0, 6 and 9			
Industrial Applicability (IA)	Claims	1-21	YES		
	Claims	NONE	NO		
2. CITATIONS AND EXPLANATIONS Claims 1-3,6 and 8 lack novelty under PCT Article 33(2) as being anticipated by Constein (US 6,349,185 B1).  Constein teaches a fluid formed in a wellbore which can comprise a particulate chelating agent (see column 6, lines 20-41, column 3, lines 19-22 and column 11, lines 1-40).  Claims 1-3, 5 and 6 lack novelty under PCT Article 33(2) as being anticipated by Lagnemo (US 5,846,922).  Lagnemo teaches a composition which comprises water and a particulate chelating within the scope of the present invention (see column 3, line 62 - column 4, line 2 and Example 1). The intended use as a well fluid does not distinguish over the prior art.  Claims 1-4, 6, 8 and 9 lack novelty under PCT Article 33(2) as being anticipated by Kardos (US 5225087).  Kardos teaches a composition which comprises water and a particulate chelating within the scope of the present invention (see column 5, lines 26-33 and Examples). The intended use as a well fluid does not distinguish over the prior art.  Claims 7 and 10-21 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the specified corrosion inhibitor of claim 7, or the method of claims 10-21.  Claims 1-21 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.					
Form PCT/IPEA/409 (Box V) (July 1998)
